- Docker

PROFILE

Results-driven Software Engineer with demonstrated success at Acacia Systems, specialising in cross-disciplinary collaboration to enhance project outcomes. Able to initiate and maintain effective communication among diverse teams, facilitating seamless workflow and innovation. Committed to leveraging technical expertise to drive project efficiency and deliver high-quality solutions.

WORK EXPERIENCE

Acacia Systems

FEB 2023 - PRESENT

Software Engineer

- Developed and maintained** scalable web applications, focusing on both frontend (TypeScript, Vue.js) and backend (C++) components.
- Bridged communication gaps** between frontend and backend teams, facilitating collaboration on cross-functional features and resolving integration challenges.
- Led and facilitated code reviews** for both frontend and backend codebases, ensuring best practices, code quality, and consistency across teams.
- Implemented unit and integration tests** to ensure robust, error-free deployments across both frontend and backend layers.

Double Edge Studios

JAN 2022 - DEC 2023

Programmer

- Developed and maintained** Ability Arena, a game serving over 300k users within four months of release.
- Collaborated with team members** to ensure clean, efficient coding practices.
- Maintained continuous communication with players** to gather feedback, assess needs, and adjust development priorities, ensuring that the software evolved in line with user goals and expectations.
